

# **CAS Workshop**

**Closing Session**

**Roman Klinger**

# What we did today

Affective Computing  
Cultural Variation Expression synchrony Understanding Sentiment Analysis  
Communication Expression Perception Agents  
Psychology Action Toxic Natural Language Processing  
Behaviour Positivity Meaning Pragmatics Applications  
Psychological Social Psychology Politeness Speech Language  
Distancing Situated Variation Feelings Societal Impact Probabilistic Modeling  
Emotional Granularity **Computational Affective Sciences** Data LLM Literary Studies  
Affect Cognition Goals Norms Multimodality Perspectivism Topic Modeling  
Emotions Beliefs Interdisciplinarity Context Evaluation  
Coping Intentions Annotation Agreement Word Counting  
Wellbeing Bodily Sensations Construal Narrative Semantic Roles  
Attention Appraisal Agency  
Event Lexical Semantics Syntax

# What's next?

- Our goal is to bring together researchers interested in affect across communities.
- We plan to propose the CAS workshop alternating between other computational conferences, NLP conferences, and psychology venues.
- What else would you like to be part of this workshop?
- Any suggestions how to improve this workshop?

**Thank you all for participation and contributing to this workshop!**
